ABOUT ME

With over 2 years of experience as a Freelance 3D Environment Artist, I am skilled in creating both realistic and stylized environments using Blender. My expertise includes 3D modeling, texturing, lighting, rendering, and asset optimization. Through freelance projects, I have delivered high-quality environments that balance visual quality with performance, while meeting project deadlines and client requirements.

EDUCATION

2022 - 2026	Bachelor's Degree in Computer Education
Kanchanaburi Rajabhat University	- Graduated with First-Class Honors (GPA: 3.87) - Focused on 3D modeling, texturing, lighting, rendering, and environment design. 1st Place Winner in the P.C.N.K. Academic Symposium Website Development Competition

EXPERIENCE

2024 - 2026	Freelance 3D Artist
Self-Employed	- Designed and developed environment assets and scenes using Blender. - Created game-ready models with efficient topology, and UV mapping - Applied lighting, composition, and rendering techniques to produce visually engaging environments. - Optimized assets for performance while maintaining visual fidelity. - Worked directly with clients to translate concepts into production-ready 3D content.
